Confidential Report: Low Back Pain

"Local Doctor Reveals The Shocking Truth About Getting Rid Of Low Back Pain! Read This Special, FREE Report To Find Out What Your Friends, Family, Or Even Your Doctor May Not Know About How To Eliminate Low Back Pain Once And For All!"

Keep reading this special report to find out about the natural methods to ending your misery that even your own doctor may not know about! Inside this FREE report you'll discover:

- ✓ Why going to your doctor could make your back pain worse if not properly diagnosed!
- ✓ Why 50-53% of low back surgeries are unnecessary and unsuccessful!
- ✓ What you don't know about using pain relievers CAN hurt you!
- ✓ Some of the most successful treatment of low back pain doesn't involve drugs or surgery!
- ✓ What to do right now if you suffer from ANY back pain! And much more!

WARNING: Low back pain is an often mistreated and potentially dangerous disorder that affects the lives of millions of Americans each year. That's the bad news. The GOOD NEWS is that you may not have to continue suffering! Keep reading this report to find out the well-hidden truth you won't find anywhere else!

Dear Friend,

Since you requested this Special Report, you or a loved one may be suffering from the horrible condition that strikes millions of Americans each year called 'low back pain'.

Because what we're going to reveal inside this report may show you how to finally rid yourself of low back pain without drugs or surgery...please be sure to read everything in here since it may be the most important thing you've read in a long time!

Before we get started, do you ever find yourself asking any or all of these questions:

- Why does my back hurt?
- Why doesn't the pain just go away?
- Why can't I just be like normal people?
- How bad can this get?
- Will I eventually be crippled?
- Will I ever be able to live the life I used to?

See, if any one of these problems or concerns is creating a situation that is affecting the quality of your life, then you need to finish reading this report right now! Why do I say this?

Because you may discover how to get on a path where your pain and suffering can be relieved quickly, naturally, and affordably!

Nothing Is Worse Than Feeling Great Mentally, Wanting To Take In All Life Has To Offer...Only To Have Your Natural Enthusiasm And Drive Squashed Because Your Back Hurts And The Pain Just Won't Go Away!

Right?

Isn't it sad to feel so alive and full of vigor, and not be able to do all the things you want to do because the low back pain you suffer from is so pervasive, so intruding, and so unfair? Don't you feel downright angry because this pain, these symptoms, just won't go away?

If you do, it's only normal. After all, who wants to be burdened with carrying a load of discomfort, and living life through an all-encompassing fog of pain. Pain that's always there when you stand up, sit down, lay down, or even bend over. Pain that's always rearing it's head, no matter how hard you try to ignore it.

It's natural for people to try to tough it out and get on with their lives. 'If I ignore it long enough, it will go away...'" Unfortunately, this isn't the case. Ignoring your pain will only make it worse over time. What was only a mild pain a year or month ago, may become a chronic, crippling pain years down the road.

See, low back pain is so bad because it sort of sneaks up on you. The real cause of the pain you're feeling right now may have happened years ago. It may have been such a small injury you may not have noticed it. Or maybe you felt a slight pain, but it went away after a day or week so you didn't think anything of it.

And slowly, over the years, as you continued to do your normal activities, that old injury has secretly gotten worse and worse without you being aware of it. After a time, the straws slowly built up until one day

they broke the camel's back. Maybe what finally put you over the edge was that heavy chair you tried to lift, or that time you bent over too quick, or any one of a hundred things.

Whatever it was,

The Fact Is You Are Suffering From Low Back Pain And You Don't Have To Suffer Anymore!

So what do you do? What choices do you have? See, you wouldn't have requested this special report if you weren't experiencing some level of pain and discomfort. We know you may have already tried getting some relief from over-the-counter drugs, or maybe you met with your private doctor?

Let me share with you the story of a woman named Emily.

Emily is a 30-year old mother of two who works as a project manager with a local corporation. For the past few years, Emily has suffered from a mild pain in her low back that would come from time to time, but since it had always gone away after a day or so, she knew if she toughed it out then she'd be okay.

One day, in a rush to get the kids to daycare before work, Emily tried to pick up her 4-year old the same way she's always done. But this time was different, she felt a sharp pain in her back, a pain she had never felt before.

For the next day, the pain would not go away. She tossed and turned all night, but no matter how she laid down, the pain would not go away. Finally, at 2 AM, she sent her husband to the store to find a pain reliever she could take that would help her sleep.

Right away she felt better, but she'd have to take another couple pills every couple hours because the pain would come right back as soon as the pill wore off. After a couple weeks, she was taking more pills more often just to keep the pain away so she could get on with her life.

The Shocking Truth About Over-The-Counter Drugs And Why They Don't Really Get Rid Of Low Back Pain!

What many drug companies don't want you to know is that their drugs do not cure you of what causes low back pain.

You see, the way these drugs work is to disable, for a short time, your brain's ability to feel the sensation of pain coming from your back. The pain's still there, you just can't feel it! It's just like sweeping dirt under a rug. Just because you can't see/feel it, doesn't mean it's not there!

The dirty little secret about these pills is because you can't feel any pain, your body has no way to stop you from injuring your back more and more. Pain is your body's way of saying, "don't do that!" Because your body is effectively disabled from protecting you, you will only hurt yourself more and more by taking more pills.

At the same time, while you're at a greater risk to only make your pain worse and worse, you are putting yourself at risk to suffer from the nasty side effects of the most common pain relievers that can damage your stomach, kidneys, and liver.

Obviously, using over-the-counter drugs is not the way to go when it comes to getting rid of the real cause of low back pain.

After two months of taking non-stop pain relief drugs, Emily realized she was no better off and she just didn't feel like the same pleasant person she'd always been. Out of desperation, Emily went to her family doctor she'd been seeing since she was 10. He had to know how to get rid of her back pain once and for all!

After a brief conversation in the exam room, Dr. Olson told Emily she had probably strained a few muscles in her back. He gave her a pat on the head and a prescription for some stronger pain relievers and some muscle relaxers. "Take a couple days off", he said. "Relax, stay in bed. You'll be back to yourself in no time. If it gets worse, come back in and we'll try something else."

Emily stayed in bed for two days taking more and more pills just like her doctor instructed her to. But, things didn't get better. In fact, she only got worse.

Most Doctors Lack The Training & Experience To Effectively Treat YOUR Low Back Pain!

What Emily didn't know was that her doctor was never trained to detect or diagnose the real cause of her pain. In fact, most doctors have no idea how to treat someone with low back pain. It's just not their specialty. And since they have no background in this area, they make improper diagnoses' and then deliver improper treatments that just plain don't work. It is not their fault, they never received the correct training.

You see, a large cause of back pain, especially in the low back, is due to a misalignment of the spine. Even if only one bone is just slightly out of whack, that can cause the nerves in your spine to become compressed. The result is pain. Most doctors are trained to relieve symptoms, to sweep your pain under the rug. All the while, the REAL cause of your pain is still there.

Unless The REAL Cause Of Your Pain Is Treated, You'll Never Get Better!

Emily didn't know about any of this, just like you may not have. But because you now have this knowledge in your hands, you won't have to suffer like Emily did.

Soon enough, Emily was back in Dr. Olson's office feeling worse than ever. She and her husband seemed to always be fighting, and her relationships with her kids were no better. Her 4-year old now referred to her as 'mean mommy'. If Dr. Olson couldn't help her, she didn't know what she would do.

Dr. Olson told her physical therapy would be the answer. He told her he knew a great therapist, and before she knew it, her life would be back to normal.

Don't get me wrong. Sometimes physical therapy can help someone tremendously. In many instances, I send my own patients to a physical therapist, at the proper time and when I know it is necessary.

In Mathematical Terms: Wrong Diagnosis + Wrong Treatment = YOU're Still In Pain

You see, the reason for this goes all the way back to your doctor's ability to diagnose the true cause of your pain. If he or she cannot clearly identify what's making you hurt, then the instructions they give to the physical therapist don't stand a chance of working. It's like trying to bake a cake with the instructions for making chocolate chip cookies.

Most medical treatments for getting rid of low back pain only focus on getting rid of symptoms. For instance, a cortisone shot in your back may reduce the swelling on your nerves for a short time, but the pain may still be there waiting for you when it wears off. Certain medications do much of the same thing, but may leave you open to potentially dangerous side effects. Other treatments like physical therapy could be ineffective because they stem from a misdiagnosis.

After two months, Emily returned to her doctor in tears. Her life was a wreck. She was a mere shadow of the woman she once was. She could no longer sit straight in her chair without sharp pains or do anything she once enjoyed without feeling pain and discomfort.

Dr. Olson sat down beside her and put his hand on her shoulder, "Emily, I've done all I can. I'm going to refer you to Dr. Smith. He's a surgeon who's worked with cases like yours before. He's had some success stories you may find interesting, although he can't promise he'll be able to cure you. You may just have to learn to live with some pain for the rest of your life..."

Believe it or not, these words are spoken all around the country every day of the year. Maybe they've even been spoken to you. This raises too many questions: What if they're wrong? What if my problem doesn't go away? What if it gets worse?

This kind of thing happens when surgery, for the wrong reasons, is suggested. In fact,

Improper Back Surgery Is Often The Most Ineffective Form Of Surgery There Is. Some Studies Have Even Declared A Success Rate Of Only 47-50%!

Many Surgeries Result In Only Temporary Relief Or None At All When the Wrong Procedure Is Performed For The Wrong Person!

And to top it all off, each time you go under the knife, you need to face the small but potential risk of going under general anesthesia and also of getting an infection! Don't get me wrong. Sometimes spinal surgery can help someone tremendously. In some instances, I have sent my own patients to an Orthopedic Surgeon that specializes in spines only, but this was at the proper time and for the proper reasons...when all conservative options failed. But before all else, you must educate yourself about your options and what is available.

Listen! You may not have to live with this! You DO have other options! You may not have to be on sleep-inducing drugs to keep the pain under control! You may not have to get used to tingling, numbness, and sharp pains! You should not have to alter your lifestyle because of low back pain!

There is a better option! And luckily for Emily and YOU, it's about to be revealed. You're about to...

Discover What Several University Studies Have Declared As The Safest, Quickest, And Most Successful Treatment Of Low Back Pain To Date...

This is the most advanced, scientifically correct treatment there is. You see, this method doesn't just sweep pain under the rug, it goes right after the REAL cause of your condition and treats that. Because the source of your pain is being taken away, you'll quickly be out of pain, possibly permanently! Like any truly advanced form of healing, this method works with your body's own natural healing powers (that's right, with some help your body can take care of itself!) to put you back to where you were physically before you were ever hurt!

Isn't that how healthcare should be delivered in the first place? Don't you agree?

My name is Dr. Barry Rizzo.

As a Doctor of Chiropractic, I've been trained to not only detect the spinal misalignments that you may suffer from, but I've also been trained to correct these problems and get you out of pain fast and, if possible, permanently.

Now, don't think because my methods are non-drug and non-surgical they are old-fashioned or low-tech. No way. What we're talking about is a very sophisticated natural protocol to treat the problems in your low back that you have developed and can't get rid of. Just because we don't cut you open and view each vertebrae in your back under a lens, doesn't mean what we do isn't at the forefront of healthcare and won't dramatically enhance the quality of your life! Actually, in some of my most advanced cases, I will perform treatment at one of several surgery centers, utilizing a team of medical physicians, chiropractic physicians and nurses.

We've been treating victims of low back pain, just like you, for over 8 years - - this stuff just plain works! There's something you've got to keep in mind. We are dedicated to changing the lives of low back pain sufferers here in Toms River. This is what we do. This is our calling. This is what we know forward and backward. We have developed an alliance with the medical community, to provide the best care possible for people like yourself who has been suffering from low back pain.

We've got over 8 years of experience helping low back pain victims get out of pain quickly and naturally without drugs or surgery under our belts. And should medical management be necessary or surgery required, we can guide you. We work closely with medical physicians in all specialties, that work on treating low back pain.

I've Got Over 24,000 Hours Of Clinical Experience In Treating Low Back Pain To Back Up What I'm Telling You Right Now! What We Do Is Scientifically Correct And Proven By Thousands of Patients Who Used To Suffer...And No Longer Do!

Odds are, we've seen and helped people with the same exact problem you suffer from right now. (Without drugs and surgery, don't forget!)

See, unlike some doctors, and possibly even your friends or spouse...we understand exactly how you feel. In fact, one of the reasons I decided to become a doctor was because I saw my family suffering from low back pain and nothing would work until they finally saw a chiropractor who knew exactly what was wrong with them and how to fix it.

We don't think your pain's "in your head" or that "you're exaggerating". We don't think it's something you need to get used to or learn to live with. No.

We know how much you hurt. We know how horrible it is to have a lingering pain that you can't do anything to get rid of. We know how it feels to not be able to do the activities you used to love or to tell a child "Mommy can't do that with you right now."

When you explain your problems to us, we're not going to downplay them just because they don't appear on the surface or easily show up on an x-ray.

We're not going to feed you lines like other doctors, like, "you're just going to have to learn to live with the pain." And we're not going to scare you into undergoing risky and expensive procedures for one of the most misdiagnosed and mistreated conditions in the country...

Low Back Pain!

Two days before her surgery was scheduled, Emily bumped into an old friend from high school while shopping for groceries. It wasn't long before she was crying on her friend's shoulder explaining all that she'd been through with her pain, her kids, her job, and her husband.

Concerned, her friend Jessica brought her to my office explaining to her that I had treated her husband a year before, and soon enough he was as good as new. I sat down with Emily and listened to her story. I explained a little about the same method I'm telling you about. Immediately her eyes lit up and she was eager for me to do an on-the-spot exam to find out what was really wrong with her. After a quick and painless examination, I spotted a couple problem areas in her back, and from there we designed a Recommended Action Plan to get her out of pain quickly and safely without drugs or surgery.

I'm happy to tell you that now Emily has her life back. She's been pain free for six months now and she reports to me she's feeling fantastic!

We're not going to make you feel like there's something weird or wrong with you. You're not going to have to feel like you have to be guarded or cautious when you explain your ailments to us. We WANT you to unload your feelings, concerns, and fears so we can help you get better! WE UNDERSTAND.

While we can't brag about being able to treat every condition that every person can suffer from...we do brag about being one of the leading authorities in the treatment of low back pain in the entire Toms River area!

When you have a suffering marriage, for example, instead of going to the bar and covering up your pains and problems with alcohol, you should consult with a counselor specializing in spousal relationships. Similarly, when you have a low back problem, you should get professional help by a health care professional who only focuses on problems such as yours; experienced in finding and fixing the problem, not covering it up. Does that make sense?

When YOU Have Low Back Pain, You Should Be Calling US!

We will never claim to be something we're not. But if you want to get the right diagnosis, the correct evaluation, the proper treatment for your pain and numbness...then we are the experts to help you!

In this day and age of specialization, you need to always work with the right professionals who are trained and experienced, and who *specialize* in the area you need help in. Being “familiar” or “knowledgeable” about low back pain isn’t even *close* to being enough.

You need to get advice and help from people who have made getting rid of low back pain once and for all their life’s work!

You wouldn’t want to have your child delivered by a doctor who assists with deliveries every now and then, would you? You wouldn’t want your teeth cleaned by someone who does that once or twice a month, would you?

So why would you go to a physician who has little, if any, working knowledge of EXACTLY how to diagnose and use non-chemical, non-surgical treatments to remove the CAUSE of low back pain?

It doesn’t make sense. Now you know who does have the answers you seek so desperately. You’re almost there. So don’t stop now! If you’re interested in checking this out further, you may be wondering what’s the best way to get the information you need to be able to make an educated decision on what to do.

Well, we have a FREE and non-threatening way to do this that you’re going to like!

A FREE Low Back Pain Assessment Evaluation and Hydrotherapy Session!

(You must Respond By The Date Stamped On The Insert That Came With This Report. Otherwise we’ll have to wait until we get a cancellation to schedule your appointment)

When you come in, you’ll have the chance to meet with us, get to know us, and tell us about your problem. This evaluation will give us an idea about the severity and true location of your ailment.

If, after the appointment, you believe there's no benefit to working with us, you simply leave and that is that. However, if you do find that you can use our help, then we will discuss how we proceed from there that includes verifying your insurance coverage and our low, no-interest monthly payment options.

So, if you’re experiencing symptoms, have been treated with little or no improvement, or want a second opinion to compare what we have to say to the care you’re currently receiving, please CALL US RIGHT NOW at 732-797-1771. Our appointment calendar is always booked solid - so don’t procrastinate. If you’re concerned, make that call to us now. What have you got to lose? Why not finally get better? Either way, we wish you good luck, with a bright future, shining in the light of excellent health!

Sincerely,

Barry Rizzo, DC

Dr. Barry Rizzo

Clinic Director of Integrated Pain Management and Rehabilitation, LLC

P.S. No matter what else you do, please find out what’s really wrong with you. You will be given the results of the exam to take home with you. Don’t suffer needlessly. You may be able to get yourself better, quickly, without drugs or surgery!

(Medical and legal disclaimer: advice enclosed herein is designed to educate the back pain sufferer, not provide medical or legal consultations. Please consult in-person with a licensed attorney or doctor, such as myself, in order to assess your legal and health status, respectively.)
